

Neighbourhood crime report

Recorded crime summary for SW1A 1AA

This 12-month report summarises 1,131 published incidents within 0.5 km of the searched postcode (Jun 2025 to May 2026) as a check on the recent published pattern.

Read this as a summary of published police data for one postcode-centred search area, not as a safety rating.

Postcode searched	SW1A 1AA	Radius used	0.5 km
Requested report window	Jun 2025 to May 2026	Published records returned	Jun 2025 to May 2026
Centre point used	51.50101, -0.14156	Generated on	30 Jul 2026
Product tier	12-month report		

Published incidents

1,131

Largest category

Theft From The Person

Biggest difference vs police area

Theft From The Person: a much larger share here

Latest published month

May 2026

Main findings

- Theft From The Person was the largest published category, making up about 3 in 10 recorded incidents in the search area (32.9%).
- Compared with the wider Metropolitan police area, Theft From The Person makes up a much larger share of local incidents (32.9% here vs 6.3% across the force area).
- Compared with England and Wales, Theft From The Person makes up a much larger share of local incidents (32.9% here vs 2.4% nationally).
- Recent 3 months returned 220 published records, compared with 251 in the earlier comparison period.

Important limitations

- This report describes recorded incidents in the published dataset, not all crime experienced in the area.
- Published police locations are approximate and should not be treated as exact addresses or exact incident points.
- Outcome labels are shown as published and are not the same as court results or a full case history.
- Recent months can move as police forces revise or backfill published records.

Compared with the wider police area

This comparison uses the wider Metropolitan police area in the same report window. It helps show whether the search area has a different category mix from the broader force area that covers it.

Published incidents in this search

1,131

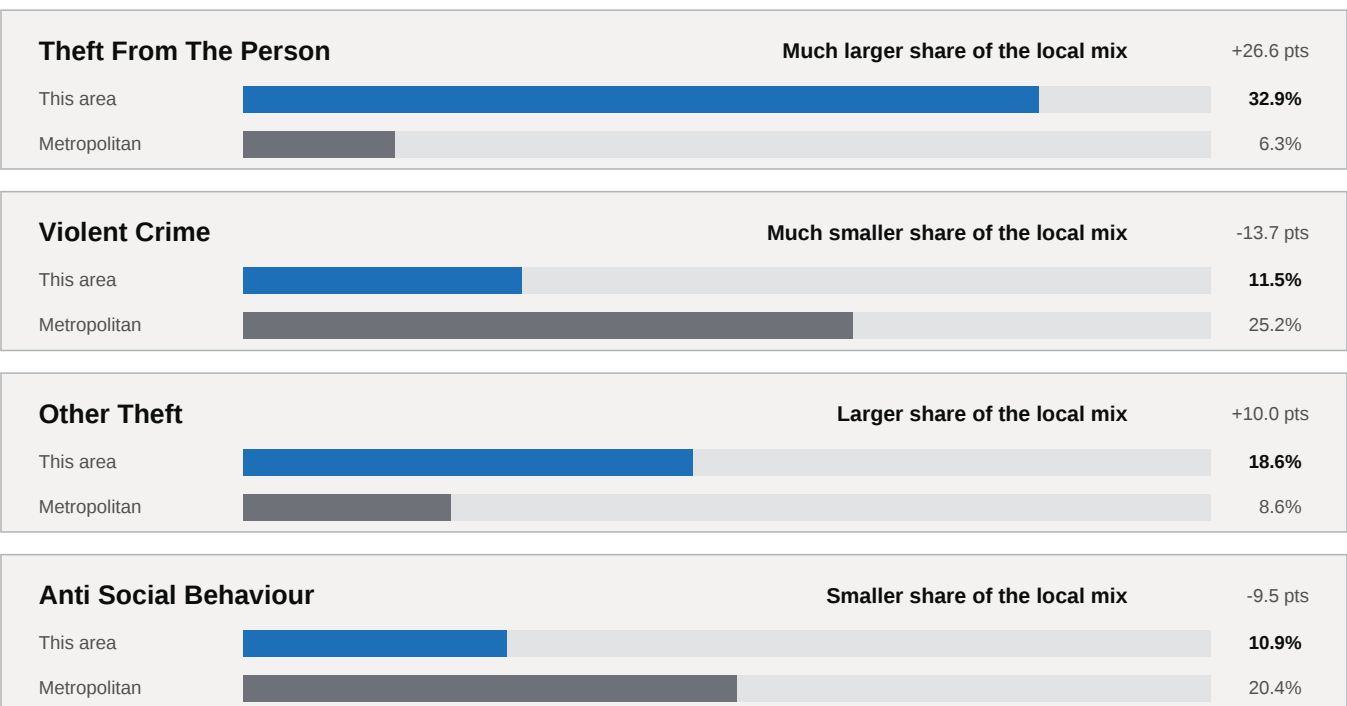

The incidents returned for the postcode-centred search area

Published incidents across Metropolitan

1,242,573

All published incidents across the wider Metropolitan police area in the same window

This area compared with the wider police area

A wider police-area comparison keeps the source and the time window aligned. It still does not account for population, land use, or visitor activity.

Compared with England and Wales

This page compares the local mix of crime categories with the England and Wales pattern. It shows differences in category share, not differences in resident crime rate. The England and Wales benchmark uses all published incidents across England and Wales between Jun 2025 and May 2026.

Local share against England and Wales share

What stands out

- Theft From The Person makes up 32.9% of local incidents, far above its 2.4% England and Wales share.
- Violent Crime makes up 11.5% of local incidents, far below its 34.0% England and Wales share.
- Other Theft makes up 18.6% of local incidents, far above its 6.9% England and Wales share.

How to read this page

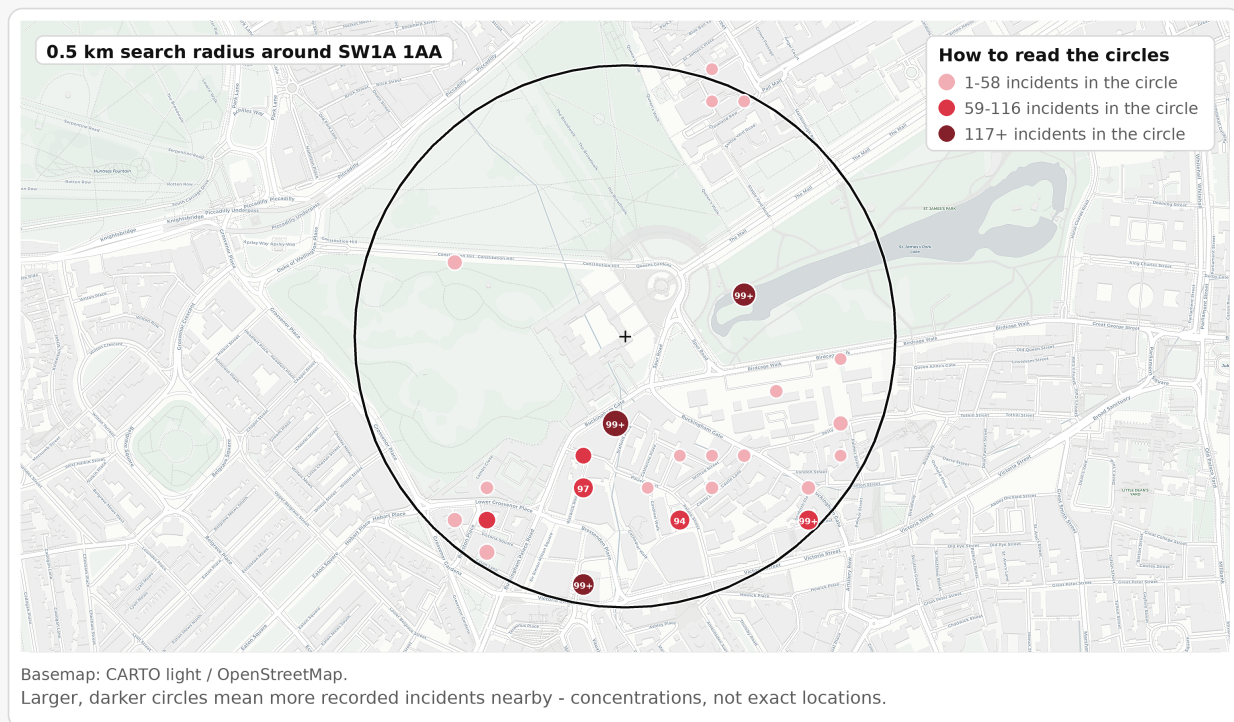

- This comparison helps describe the local category mix. It is not a score or a ranking.
- Shares always add up to 100%, so one very large category pushes every other category's share down. A smaller share does not mean fewer incidents than elsewhere.
- Differences can reflect land use, transport activity, reporting patterns, and local policing as well as crime conditions.

Maps

These maps show the searched area and broad concentrations in the published data. They are designed to stay cautious about location precision.

Concentration

Grouped incident counts from approximate published police points within the searched radius

Largest concentrations

The biggest clusters sit around the most repeated published labels: On or near Buckingham Mews (167 records), On or near Park/open Space (140 records), On or near Theatre/concert Hall (138 records). These labels are anonymised street references, not exact addresses.

The concentration map groups nearby published points together so you can see broad clusters without making the underlying data look more exact than it is.

Categories, location labels, and published outcomes

Theft From The Person

372 incidents | 32.9% of local total

About 3 in 10 recorded incidents here were Theft From The Person; across England and Wales the figure is fewer than 1 in 10.

Most repeated location label: On or near Buckingham Mews (110 records)

Much larger share of the local mix

+30.4 pts vs England & Wales

Other Theft

210 incidents | 18.6% of local total

About 2 in 10 recorded incidents here were Other Theft; across England and Wales the figure is about 1 in 10.

Most repeated location label: On or near Victoria Square (38 records)

Much larger share of the local mix

+11.7 pts vs England & Wales

Violent Crime

130 incidents | 11.5% of local total

About 1 in 10 recorded incidents here were Violent Crime; across England and Wales the figure is about 3 in 10.

Most repeated location label: On or near Theatre/concert Hall (27 records)

Much smaller share of the local mix

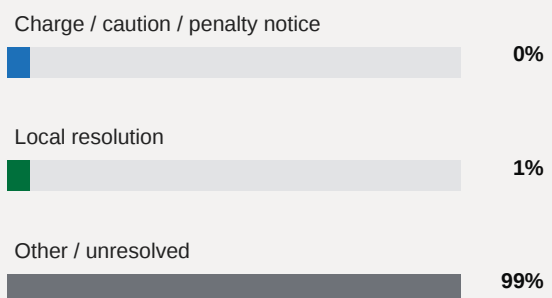

-22.5 pts vs England & Wales

Most repeated labels

These are repeated published location labels, not exact address points.

On or near Buckingham Mews	167
On or near Park/open Space	140
On or near Theatre/concert Hall	138
On or near Spenser Street	101
On or near Palace Street	94
On or near Warwick Row	81

Published outcome mix

Across England and Wales in the same benchmark window, 97% of published records were also unresolved or closed without a published charge, so a high local figure is not unusual. Published outcomes do not represent the full life of a case.

Published location labels and published outcomes are useful context, but both are partial. Read them as broad evidence about recorded patterns, not as a complete case history or an exact incident map.

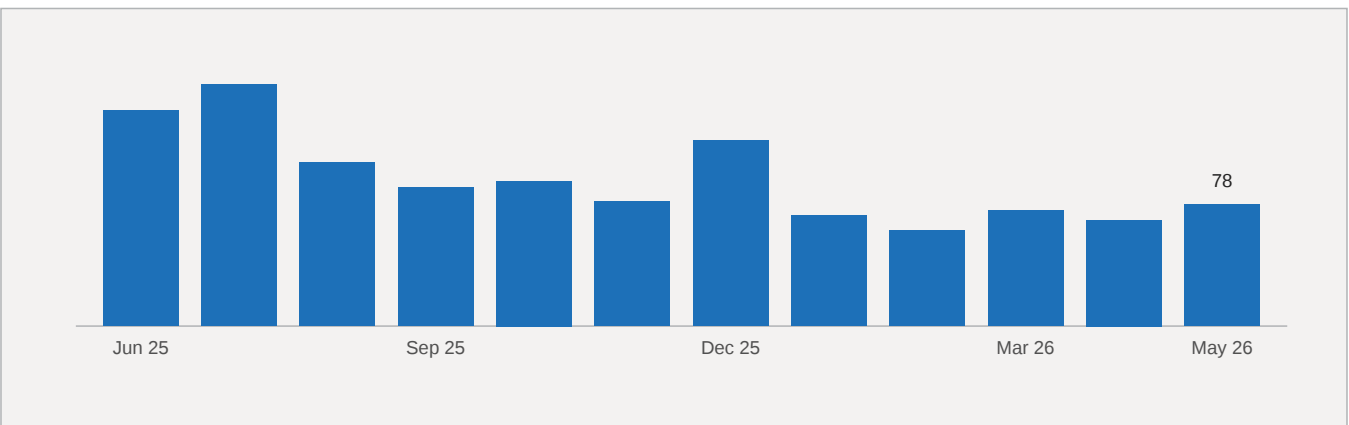

Trend and how the report was built

This page shows recent published movement inside the one-year report window.

Recent 3 months returned 220 published records, compared with 251 in the earlier comparison period. Mar 2026 to May 2026 compared with Dec 2025 to Feb 2026

Month-by-month published volume (12-month window)

Latest month vs previous month: +10 records.

This chart shows recent movement inside one year. Recent months may change as published data is revised.

Method summary

- Incidents were selected within 0.5 km of the postcode centre (51.50101, -0.14156).
- Police-area comparison uses the constabulary attached to published incidents in the same report window. England and Wales comparison uses the overall published category pattern.
- Category mix benchmarking compares the local share of incidents with the England and Wales share for the same category. The England and Wales benchmark uses all published incidents across England and Wales between Jun 2025 and May 2026.

Why the report keeps things cautious

- data.police.uk street-level crime data under the Open Government Licence.
- Query window: 2025-06 to 2026-05.
- No rate per resident is shown because the report does not yet have an official population figure for this exact search shape.

This report describes recorded incidents in the published dataset, not all crime experienced in the area. Published police locations are approximate and should not be treated as exact addresses or exact incident points. Outcome labels are shown as published and are not the same as court results or a full case history. Recent months can move as police forces revise or backfill published records.
